## About This Game

Gary the Gull is an VR Interactive Animated Short Film where you are part of the story!

You're about to enjoy a tasty lunch on a beach when a seagull shows up and starts talking to you. And you can talk back! Answer Gary's questions by nodding or shaking your head, talking (using voice recognition), or by doing nothing at all. Your decisions affect how the story plays out, giving you different experiences of the same narrative when you try it again. Interact with the environment by using motion controllers to draw in the sand, pick up your drink, or toss your flip-flops around on the beach.

Gary the Gull is directed by Mark Walsh of *Motional*, an 18-year Pixar writer-director and animation supervisor, including the director of the Pixar short film *Partysaurus Rex*. It was built in partnership with the ex-Pixar ex-Bungie team at *Limitless*.

7/10 tumours got enough cancer cells to feed entire Africa. Think this games good?

Think again.. This is my favourite Jeff Minter game so far. I thought it was going to be something Tempest-y from the look of it, but it's really more of a surreal driving game. Think Race the Sun, Torus Trooper or Buggy Boy.

It's more forgiving than it looks: it hands out extra lives like candy and lets you restart from any level. But there's still plenty of optional stuff to go for if you're doing well. High skill ceiling, low skill floor. Well, low-ish; it's still a face-meltingly fast game. More visually comprehensible than Space Giraffe too. It's good.. I loved Momento Temporis and will replay it. A UNIQUE and creative Metroidvania that doesn't hold your hand and rewards exploration and the discovery of secret rooms. I got the same kind of "I want to explore this new world" feeling I did when I started playing ESA (Environmental Station Alpha). It will have future areas unlocked, but the price is right for the amount of content you get now. I don't agree with the negative reviews regarding this topic at all. The developer fixed a bug I reported faster than anyone else ever has for me so clearly he is still supporting and developing. He also answered other questions I had very promptly. Not a single negative in my opinion.. **DON'T BOTHER BUYING THIS ADD-ON. SAVE YOUR MONEY.**

Absolutely rubbish. I got excited when DTG withdrew this add-on. I thought finally they are going to fix it. But, no.

The Class 156 hasn't been fixed at all. It still used way too much fuel to be used practically. I've just this minute driven it the approximately 5 miles from Edinburgh Waverley to Edinburgh Park and it used 15 gallon per coach, about 14 times more than it should. For god sakes it used two of those gallons in one minute while sat in idle at Edinburgh Waverley. It also still rolls like the town drunk even at normal line speed and derails due to "consist tilt".

Dove Tail get your finger pulled out and fix this now!. A fun little puzzle game, that's a great time waster, it's an enjoyable concept for a puzzle game and one that interesting enough to keep your satisfied for a fair amount of time as it introduces new things to keep the game interesting, which i find is very unlike most puzzle games, as by doing the same thing constantly without changing the game play in anyway, you get sick of the game much quicker, so i'm glad it has that, would definately recommend this to any puzzled game fan like me, a fairly light and easy puzzler, well worth 5/5.. I really loved this game. There isn't much challenge up until the last 5 levels. Especially the last 2 levels pulled out teeth, but it was still enjoyable overall. The controls and graphic are very well done.

---

This game is actually really cool. Great idea and just mildly infuriating enough to stay interesting. Keep it up!. i see everyone disagree, about my review, and yes i just realize something.

the game actually progress to win, and a good game, but everything is gambling in this game, if you're a gambler, go ahead and play it

(bad english). Really enjoying this game! Not sure why there are so many mixed reviews - it seems like most folks on here are biased against racing games anyway, so I think that's why.

The controller works just fine (there's an options menu off the main menu where you can choose input) and it's got a great soundtrack. Graphics are good enough - sure, it's a mobile port so the graphics \*could\* be better on your uber:pc but you know what this is a low budget racer and its not like you're paying full whack for it - the graphics are good enough and when you're whizzing down the tracks at a zillion mph you should probably be concentrating on the gameplay instead!!

I got it on sale, so I'm super happy with my purchase but I don't think I'd be too disappointed at full price. It's a very playable fun little arcade game :). Pretty short, but enjoyable. I picked it up for \$2 during a sale so I am not complaining about its length. I managed to beat the game and get all achievements in one 3 hour sitting. It was an enjoyable 3 hours. Also, it was a frustrating 3 hours. The game can be brutal sometimes and it's f\*cked up for that.

Overall though, if you like tough platformers, it's definitely worth a few bucks.. Never experienced such badly programmed VN. There are loading circles like every 5 seconds while playing..What the Hell needs to be loaded in a VN that much??? The loading circles can take up to 20-30 seconds and make the gameplay unbearable.. I'm very disappointed with this "almost-game", i love carpfishing and wait a while until i bought this game, but honestly, it doesn't work at all, cant get a fish cause there's no key to grab the rod! And many other stuff's arent working properly.

It was the first time i ask a refund, break my heart to do it... My time on this game describes it all. I finished about 50% of the game already, and I regret it. This game is one of the worst simulator-.. NO, THE WORST ONE I have yet to play.. There is nothing possitive to say, save yourself the money and your precious time, Do NOT get this.
