876 8/12/2013 16:48:17 BluRay BluRay BluRay Yes, but not 1:1. No Yes, and they have an excellent audio track, so good as an external DVD player to play media off a PC. The quality of the audio is good and I wish it had better colorization. I don't think the problem lies with the player though, it seems like the video isn't playing properly. (In my opinion, this is probably due to my HDTV having a lower dpi and having lower quality video, so it doesn't seem that any hardware has been affected to the same degree, that being said I would say the audio is fairly mediocre if I was watching the game with it on). Yes, I would be content with just having the 1080p. Yes, they did have it with "The Hobbit" and a few other movies too.. 5/13/2014 10:47:15 Star Wars The Force Awakens 1080p Hd 5.1 2013 Star Wars The Force Awakens 1080p Hd 5.1.. 2875 1,966 Mad Max: Fury Road Movies Blu-ray 6.1 2012-10-29 2015-11-14 14:23:58 0.2.
